

Maryland Bioenergy Center is Maryland’s premier organics recycling facility. Centrally located in the Maryland Food Center in Jessup the facility is less than 30 miles from all of Baltimore and Washington, DC. Within this facility, excess organics produced by the region’s food manufacturers and retailers are transformed into renewable energy and fertile soil amendments.

This remarkable transformation both decarbonizes Maryland’s waste and energy sectors, enabling our businesses and communities to prepare for a healthy and sustainable future.

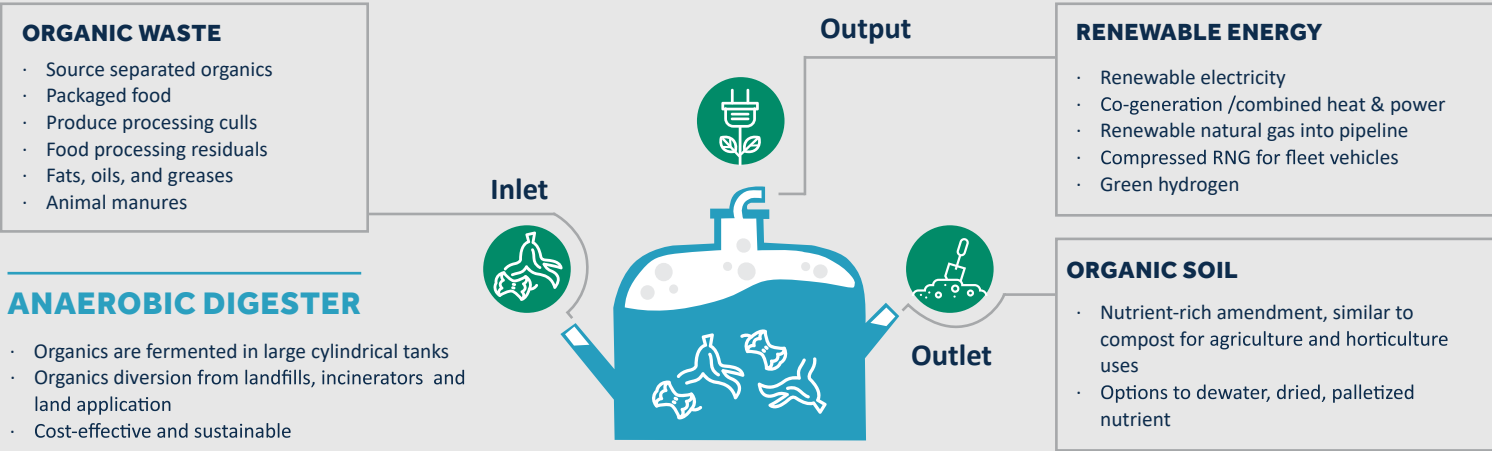

FACILITY SPECIFICATION

- » **Feedstocks:** 110,000 tons/year of solid and liquid food residuals and packaged food waste
- » **Energy Production:** 340,000 mmBTU/year (RNG)
- » **Digestate Production:** 16,575 tons/year for soil blending

ENERGY DETAILS

This commercial-scale AD facility generates 340,000 MMBtu of energy, the equivalent of:

- » The annual electrical consumption of **7,679** US households
- » **12,574** gasoline powered cars taken off the road for a year
- » **606** times the distance from Earth to the Moon by car (decarbonization impact)
